

Test and rinsing equipment

for spray manifolds

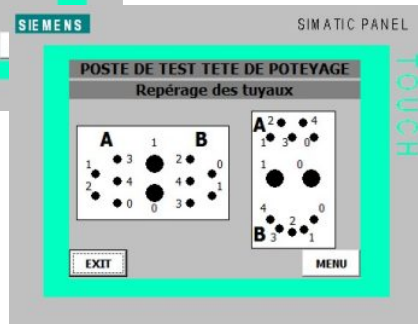

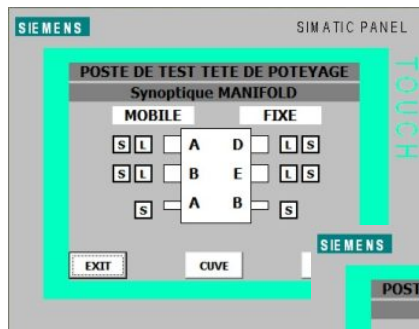

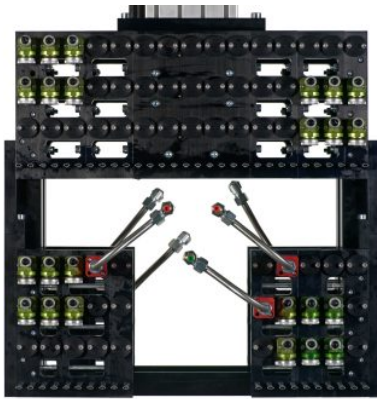

Pomac Automation

Test and rinsing equipment

The automatic rinsing equipment is able to clean and test spray manifolds. With exchangeable adapters each manifold type can be cleaned. The PLC controlled system can be easily programmed for each manifold

Features

- stainless steel cabinet
- dimensions approx. 1500 x 1000
- suitable for use manifold manufacturer
- heat exchanger
- circulation pump
- Siemens S7 PLC
- programming by HMI
